PROFESSIONAL SUMMARY

Aspiring Full-Stack Developer with hands-on experience building scalable web applications using Angular and Node.js. Skilled in integrating payment systems, implementing CI/CD pipelines, and delivering user-focused solutions. Strong foundation in both frontend and backend development with real-world deployment experience.

WORK EXPERIENCE

Laikipia Airbase Secondary School

Nanyuki

Intern

May 2024-August 2024

- Assisted teachers and students with everyday IT issues like troubleshooting computers, fixing network problems, installing software, and resolving login issues.
- Helped set up and maintain devices such as desktops, laptops, printers, and networking equipment.
- Installed operating systems, applications, antivirus programs, and ensured systems were up to date
- Helped configure routers, troubleshoot internet connectivity, manage LAN/Wi-Fi issues, and monitor network performance.
- Assisted in data entry, database updates, backups, and basic database queries.
- Assisted some teachers in managing their accounts in the student management system.
- Assisted in teaching computer studies classes

EDUCATION

Chuka University

Chuka, Kenya

Bachelor of Education(science)

Graduation Date: Nov 2025

PROJECT EXPERIENCE

PocketDuka

Remote

Developer

- Developed an e-commerce platform enabling clients to browse various products and place orders.
- Integrated payment processing systems with M-pesa, streamlining the checkout process and reducing transaction time.
- Implemented a CI/CD pipeline using GitHub Actions to automate deployment for the backend. Whenever code is pushed to the main branch, the pipeline builds a Docker image, and deploys the application to a cloud server. I also configured environment variables securely and separated staging and production workflows. This eliminated manual deployment steps and improved reliability.
- Docker repositories:**
 - Backend: <https://hub.docker.com/repository/docker/njyhier/pocketduka>
 - Frontend: <https://hub.docker.com/repository/docker/njyhier/pduka>
- Built and deployed a user-friendly web application using Angular, utilizing TypeScript's static typing to improve code reliability, maintainability, and development efficiency.
- Implemented FastAPI for the backend, accelerating development significantly, thanks to automatic data validation, auto-generated API documentation, and efficient async capabilities.
- Implemented role based access control to guard routes that require special permissions to access.

CloneX

Remote

Developer

- Developed a social media application inspired by platforms like Twitter and Instagram, enabling users to create posts, like and interact with content, and engage through comments in a dynamic, user-driven environment.
- Engineered scalable REST APIs using Node.js and Express.js, improving performance and accelerating development through non-blocking architecture and modular middleware.
- Built a dynamic frontend with Angular (TypeScript), leveraging component-based architecture for reusable UI and improved user experience.

- Implemented containerization using Docker, making development easier by ensuring a consistent development environment across different machines and deployments.
- Implemented Continuous Integration and Continuous Deployment (CI/CD) using GitHub Actions, significantly speeding up the deployment process through automated testing and delivery pipelines.
- **Docker repositories:**
 - Backend: <https://hub.docker.com/repository/docker/njyhier/clonex>
 - Frontend: <https://hub.docker.com/repository/docker/njyhier/feclonex>

SKILLS & INTERESTS

- Skills:**
- **Frontend:** Angular, React.js, TailwindCSS, TypeScript, HTML5, CSS3, BootstrapCSS
 - **Backend:** Node.js, Fastapi, Django, PostgreSQL/MySQL, MongoDB
 - **Tools:** Git (Version control), Figma (UI/UX design)
 - **DevOps:** Docker, CI/CD
